

Adler and Allan

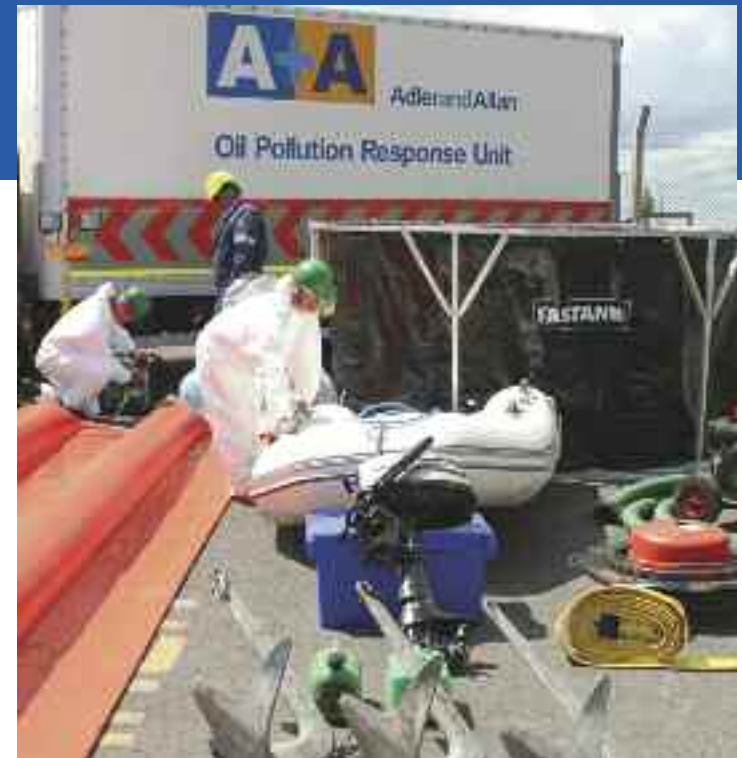

Speed, service and environmental integrity

Leaders in Response Services and Asset Resilience

A partnership with Adler and Allan gives you the best resources in the industry

The Adler and Allan Group is a market-leading provider of oil and environmental services throughout the UK, and in selected overseas markets.

During the course of our 90 year history we have built a reputation for professionalism, resourcefulness, technical expertise, commitment and above all, a tireless can-do attitude.

Current contracts include the response and waste framework for the Environment Agency; fuel management for HMRC; emergency spill

response for BP, BT and National Grid amongst many others.

We are proud to be the go-to company for utilities, leading petroleum companies, local authorities, government agencies, major retailers and many blue-chip industrial and commercial organisations.

Environmental Services

Trust Adler and Allan to help you achieve the very highest environmental standards

Every business, organisation and authority has to contend with environmental risks.

Natural disasters, such as flooding, can disrupt transport and power supplies; hazardous materials have the potential to cause widespread damage; and waste has to be collected and disposed of in line with strict regulations.

Adler and Allan has the expertise and resources to help you manage your environmental responsibilities, including damage limitation and pollution control. We provide a comprehensive range of incident prevention, environmental protection and waste management services, plus consultancy and training.

We are on call 24 hours a day to deal with your emergency response and the safe handling of hazardous waste.

“Fantastic response. Your prompt actions and resourcefulness enabled us to rapidly get the situation under control. You helped convert a challenging situation into a well-managed professional response.”

ESSO Petroleum

Flood Response and Mitigation Services

Protecting key assets from flooding

Adler and Allan help protect UK industrial and commercial businesses, including some of our most important assets – such as sub-stations, power plants and roadways – from the devastation flooding can cause.

Through years of experience dealing with a range of flooding incidents; including the extensive floods of 2007 and more recently, 2014; Adler and Allan has built up considerable expertise in emergency flood deployment and post incident remediation. As more organisations recognise the need to plan for flooding events, we have also developed an impressive capability in the assessment, design and installation of flood mitigation measures.

Absolutely brilliant effort... I can't say enough in my admiration for your team. They are a credit to you and your business."

Airport Energy

Protective Coating Services

The ultimate in asset resilience

Adler and Allan Protective Coatings provide a tough, fast-acting barrier to protect assets and infrastructure investment.

These spray coatings are highly advanced, environmentally friendly, fast-acting, efficient and suitable for a vast range of applications and are currently used in the Electrical Utilities, Power Generation, Telecoms, Manufacturing, Marine, Forecourts and Water industries.

A robust solution for organisations operating in aggressive Industrial environments.

Effectively combined with flood defences to stop oil pollution exiting and floodwater entering.

“Excellent response. Fantastic service, will cascade this incident to further promote your service.”

Scottish Power

Mechanical and Electrical Services

Planned maintenance (PPM), environmental protection and support for utility companies and tank owners and operators

Owners and operators of storage tanks for oil and chemicals rely on Adler and Allan's M&E skills, compliance knowledge and advanced diagnostic techniques to install and maintain their tanks and to reduce pollution risks.

We are experts in a wide range of facilities management support services such as tank installation, testing, inspection, repair and lining, which we combine with pollution prevention separator services and remote monitoring to build effective oil containment and flood defence systems to provide robust asset protection for utility and other companies.

"An excellent organisation, very responsive, very proactive."

Supply Chain, British Energy

Specialist Fuel and Forecourt Services

24/7 emergency supply, fuel transfers, forecourt services and fuel quality

For over 80 years Adler and Allan has provided highly professional fuel distribution and management services. With depots nationwide and the resources of Group companies E&S Environmental, we promise exceptional reliability underpinned by unrivalled expertise and equipment.

We are the preferred supplier for most of the UK's leading petroleum companies, major retailers and local authorities.

"Thank you for responding on Sunday following my call to your emergency response helpdesk, your co-ordination was both timely and professional."
